Symphony launches submarine cable project

Thailand-based international network provider Symphony Communication, in collaboration with leading telecommunication providers in Malaysia (Telekom Malaysia Berhad) and Cambodia (TelcoTech), have jointly launched the 1,300km-long Malaysia-Cambodia-Thailand Submarine Cable System in Thailand.

The move aims to establishing Thailand as Asean's telecommunication hub and gateway to the world "so as to spur communications expansions, encourage trade and investment growth, as well as facilitate economic development for Thailand and Asean", said Symphony president Teerarat Pantarasutra.
